

■ OWN YOUR INTELLIGENCE

IgniteIQ

Brand Guidelines

VERSION 4.2 · 2026

The Ontology-Powered Data Engine for the Modern Trades.

Logo usage.

The IgnitelQ lockup is a horizontal pairing of a 30 × 30 px geometric mark and the wordmark "IgnitelQ" set in Aeonik Display, weight 600, letter-spacing -0.02em. The wordmark is monochromatic — red lives in the system, not the logo.

Brand signature

Two tonal moves do the work a colored letter would in a traditional mark. The **declarative period** ends every section title — *Logo usage.* · *Color palette.* · *Voice & tone.* The **two-tone headline** splits a primary clause from a softer reflective clause and is rendered at hero scale. Together they form the brand's syntax.

DO

- Use on solid --bg-canvas or --ink-1000 with adequate contrast.
- Keep the lockup horizontal with a 10 px gap between mark and wordmark.
- Set the wordmark in Aeonik 600 — never substitute a system font.
- Maintain clear space equal to the height of the wordmark "I" on all sides.

DON'T

- Rotate, skew, or rearrange the lockup.
- Apply gradients, drop shadows, or color overlays to the mark.
- Place on photographic, textured, or low-contrast backgrounds.
- Color the wordmark — it stays single-tone in every context.

Color palette.

One neutral ramp. One accent. Four state tokens. Every value authored in oklch for perceptual consistency. Solid colors over gradients — gradients are reserved for three specific decorative cases.

Typography.

Aeonik carries display, sans, and the wordmark itself. Aeonik Fono carries every eyebrow, mono label, and code surface. There is no third typeface, and no fallback design.

Type scale

H1 HERO

Aeonik 600 · -0.04em · 0.95

Own Your Intelligence.

H2 SECTION

Aeonik 600 · -0.035em · 1.0

Better decisions. What changes for you?

H3 PILLAR

Aeonik 600 · -0.02em · 1.15

The product is the infrastructure.

Live decisions

LEAD BODY

Aeonik 400 · 19px · 1.45

Customer data stays put. The framework gets smarter — every week, every quarter, every renewal.

BODY

Aeonik 400 · 15px · 1.5

A \$15M HVAC company makes thousands of micro-decisions a day. The compounding quality of those decisions separates a 12% margin company from a 22% margin company.

EYEBROW

Aeonik Fono 500 · 11px ·
0.18em · uppercase

■ THE CONCEPT

Headline accents

Two patterns do every headline on the site.

Two-tone declarative. A primary clause in `--fg-primary` followed by a softer reflective clause in `--fg-tertiary`. Always one heading element with two spans.

Statement red. A single 140 px sentence in `rgb(239, 68, 68)` opens the home page. This is the only place body-scale type appears in red — treat it as a once-per-page event. The "Own" power word lives in language, not in colored letters.

Voice & tone.

IgnitelQ writes like an operator who has built the thing themselves. Authority without aggression. Confidence without hype. Specific over abstract — *\$15M HVAC company, twelve resolved entities, Day 7 live decisions.*

ATTRIBUTE	DESCRIPTION
BOLD	Strong, confident statements. Never apologetic.
DIRECT	Short sentences. Active voice. Period stops, not em-dashes.
OWNERSHIP-FOCUSED	"Own" is the power word. Customers own their cloud, their data, their intelligence.
OPERATOR-GROUNDED	Specific over abstract. The voice of someone who has run the trucks.
INFRASTRUCTURAL	Words like systems, framework, ontology, ships, deploys, compounds.
TWO-TONE	Primary clause + reflective clause. The reflective clause carries the contrast.

Core messaging

Tagline. Own Your Intelligence.

Mission. Owning your intelligence is the only advantage that compounds.

Positioning sentence. The Decision Engine for Modern Trades.

Manifesto. We're not an AI company. We build the infrastructure underneath — your warehouse, your ontology, your decision engine — so the AI tools sold into this market finally have a foundation that works. Customer data stays put. The framework gets smarter.

Headline gallery

AI without the foundation is expensive guessing.

HOME · THE PROBLEM

What used to take a year. Shipped in a week.

HOME · DEPLOYMENT

Built on your cloud. Run on your data.

HOW IT WORKS · HERO

Customer data stays put. The framework gets smarter.

HOW IT WORKS · COMPOUNDING

Invest in outcomes. Not experiments.

HOME · THE PATH

The product is the infrastructure. The interface is your choice.

HOW IT WORKS · HEADLESS

Components & layout.

Six load-bearing components carry the marketing surface: the eyebrow, the section frame, two-tone headlines, the trapezoid pillar, the day-timeline, and the dark CTA band. Forms, footer, and nav round it out.

Buttons

Eyebrow + section marker

HERO EYEBROW	■ THE ONTOLOGY · V4.2
SECTION MARKER	01 THE CONCEPT
FOOTER COPYRIGHT	© 2026 IGNITEIQ INC. OWN YOUR INTELLIGENCE. FRAMEWORK V4.2

Trapezoid pillar

01 SPEED Decisions in minutes instead of weeks. The data is already modeled, already current, already in your hands.	02 QUALITY Clean, unified data that understands how your business actually runs. One model of the business, not fifteen disagreeing systems.	03 TRUST A single source of truth. Every answer is traceable to the underlying data, scoped inside your environment.
--	---	---

Day timeline

DAY 0 Contract signed Workspace provisioned in your cloud.	DAY 2 Systems connected 15–25 source systems wired into the warehouse.	DAY 5 Ontology activated Jobs, leads, technicians, invoices resolved into one model.	DAY 7 Live decisions Analytics + agents shipping decisions to operators.
--	--	--	--

Form pattern

Underline-only inputs. No filled boxes, no rounded corners. Mono labels above each field. Red asterisk on required fields. Submit button is the primary CTA in --ignite-500 with a typographic arrow.

How it works

Spacing & containers

TOKEN	VALUE	USED FOR	
Section padding (desktop)	120px 32px 140px	Default section frame	
Section padding (tablet ≤1024)	96px 24px 112px	Responsive shrink	
Section padding (phone ≤640)	80px 20px 88px	Responsive shrink	
Container max-width	1320 / 1440	SectionFrame / page-edge	
TOKENS — BRAND GUIDELINES V4.2			
Card radius	10 px	Default surface	6
Button radius	6 px	Primary / secondary CTA	

Design philosophy.

Precision over decoration. Function over flourish. Infrastructure-native aesthetic — Vercel, Stripe, Linear. The brand looks like the thing it sells.

PRINCIPLE	APPLICATION
Solid colors over gradients	Three exceptions only — dark-hero red glow, StackDiagram base plane, HeroStatement grid mask. Nothing else.
Geometric SVG accents only	Trapezoid bars on pillars, isometric rhombi in stack diagrams, hairline rules between sections, monogram avatars. No icons in body copy. No decorative photography.
One accent	Red is the only brand color outside the neutral ramp. State colors exist as tokens but are reserved for the product UI, not marketing.
Mechanical motion	Easing tokens use no overshoot — <code>cubic-bezier(0.2, 0.0, 0.0, 1.0)</code> . Durations: 80 / 140 / 220 / 360 ms. Reveal stagger: 80–140 ms per element.
Two-tone, never multi-color	Headlines split into primary + reflective clauses. Body prose is a single secondary color.
Dark sections are bands, not pages	A page is light. Dark <code>--ink-1000</code> bands are inserts inside otherwise-light pages — never the default canvas of a marketing page.
Verbatim copy	Headlines, body, button labels, and footer links are byte-accurate from the canonical export. Fidelity is load-bearing.
No drop shadows on cards	Shadow is reserved for primary CTAs (red glow) and the HeroSplit product image lift.

Don'ts

VISUAL

- No icons in body prose.
- No drop shadows on cards.
- No gradients on type.
- No rounded radii > 16 px.
- No second accent color.
- No stock imagery.

MOTION & COPY

- No bouncy easing.
- No paraphrased copy — verbatim only.
- No body text in red except the once-per-page Statement.
- No skipping `<Reveal>` on section content.
- No fallback fonts as the design baseline — Aeonik or nothing.
- No dark text on dark sections — use `--ink-50`.

Cornerstone pages — 6 HTML mounts	index · how-it-works · ontology · company · contact · signin.html

Companion documents

IGNITEIQ-DESIGN-SYSTEM.md — long-form design-system reference (~13 pages). Every clamp value, geometry, stagger coefficient. Use when designing new components.

IGNITEIQ-BRAND-GUIDELINES.md — markdown twin of this PDF. Same content, plain-text for inline pasting.

CLAUDE.md (repo root) — port-loop project context: fidelity invariants, deploy flow, don'ts.

For Claude Design

If you need a file referenced above, ask Matt to paste a handoff URL or drop the file into the working directory. Headlines, body, and button labels in any new design must be byte-accurate from **exports/latest/** — paraphrasing breaks the brand voice. Prefer existing tokens and components over net-new patterns.
